

# Human Rights Violations Update.

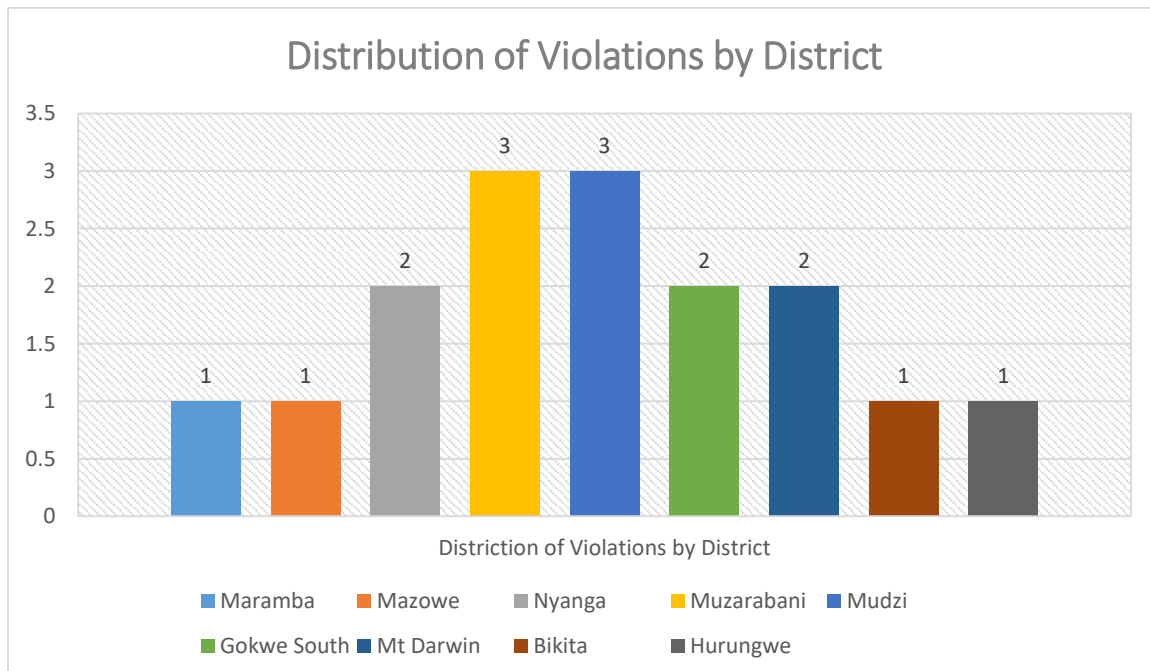

## 1.0 Summary of Violations.

Heal Zimbabwe recorded a total of 16 cases of human rights violations from 9 districts between the 20<sup>th</sup> of August and the 15<sup>th</sup> of September 2017. HZT recorded four different categories of human rights violations that include Intimidation (with threats of violence or threats of withdrawal of food aid or agricultural inputs), forced participation (in political meetings, Financial or material contributions), arson and assault. The organisation observed that Intimidation recorded the highest number of cases in this reported period with 68.75% (11 cases), followed by forced attendance to political gatherings recording 18.75% (3 cases), arson which recorded 6.25% (1 case) and assault which recorded 6.25% (1 case). Heal Zimbabwe observed that the recorded human rights violations are mainly centred on (i) ZANU PF restructuring exercises within local communities, (ii) the hype behind the recently announced Biometric Voter Registration (BVR) process which was rolled out in local communities beginning on the 18<sup>th</sup> of September 2017 and (iii) the ongoing countrywide Presidential youth interface rallies, the latest being in Bindura. Heal Zimbabwe notes with great concern the continued prevalence of human rights violations linked to intimidation in local communities. The organisation perceives intimidation as a barrier towards the realisation of peace in Zimbabwe and a stumbling block to the attainment of a democratic society as provided for in the Constitution. HZT continues to call for peace and tolerance ahead of the 2018 elections.

## 2.0 Nature of Violations Recorded.

## 2.1 Number of Cases Recorded by District.

The above diagram indicates the distribution of human rights violations by district. The distribution reveals that human rights violations were recorded in a total of 9 Districts which are: Maramba, Mazowe, Nyanga, Muzarabani, Mudzi, Gokwe South, Mt Darwin, Bikita and Hurungwe. Muzarabani (3 cases) and Mudzi (3 cases) districts recorded the highest number of violations largely because of the ZANU PF restructuring exercises in local communities.

Intimidation was recorded in 6 districts: Gokwe South, Maramba, Mt Darwin, Muzarabani, Nyanga and Mudzi. HZT observed that the human rights violations recorded in this period were perpetrated by 32 perpetrators (30 males and 2 females). ZANU PF continues to top the majority of the perpetrators with 22 recorded in this period. Eight of the perpetrators were also traditional leaders (7 village heads and 1 Headman), 1 councillor and 1 retired soldier. The majority of the victims were opposition supporters followed by ordinary community members, village heads, residents and vendors.

### **3.0 Our Intervention on Human Rights Violations.**

Heal Zimbabwe is committed to protecting and assisting survivors of torture so that they are able to access justice and requisite social services. The organisation has, in this period under review intervened in the 16 reported cases through its rapid response referral system. HZT has since forwarded the cases for further investigation to the Zimbabwe Human Rights Commission (ZHRC) and the Zimbabwe Electoral Commission (ZEC).

In an attempt to reduce violence and human rights violations, the organisation is currently reaching out to community members especially youth country wide to desist from engaging in violent activities. The organisation is running a National Peace Campaign for peaceful 2018 elections dubbed 13 Million Voices For Peace, *#13MilVoices4Peace*.

### **4.0 Conclusion**

Heal Zimbabwe observed that whilst all forms of human rights violations are unacceptable, the environment is generally peaceful with sporadic cases of covert violence being recorded. Intimidation and any other forms of human rights violations are a threat to peace and erodes the social fabric and community cohesion in local communities. HZT further calls for tolerance for divergent views and urge all political parties to craft and implement non -violent campaign strategies and desist from inciting violence and anarchy in local communities. Heal Zimbabwe appeals to the ZHRC and ZEC to launch speedy investigations into the recorded cases of violations so that justice is met for the victims. Heal Zimbabwe further urges all the citizens in the country to shun violence and promote peace in their respective spaces.
