*Monitoring Government Response to the COVID-19 Pandemic*

2021 Update # 5

## Elections in Africa in 2021

## 1. INTRODUCTION

Non-State actors have been complementing government efforts in flattening the COVID-19 curve. ZESN hopes that this report which covers developments that occurred in the month of June 2021, as reported by ZESN LTOs will complement the range of information available for use in development and reinforcing of strategies aimed at safeguarding the health of citizens who are trying to forge ahead with life in the midst of the COVID-19 pandemic.

During the reporting period, amid the threat posed by the increase in COVID-19 cases, the whole country was put under lockdown on 12 June while particular places were put under localized lockdowns with stricter measures. The Vice President and Minister of Health and Child Care, Dr. Constantine Chiwenga declared the national lockdown noting that complacency had resulted in a recent spike in COVID-19 cases. He said that the country had recorded 596 new cases and 26 deaths within the previous week, compared to the same period in May last year where there were 132 cases and six deaths.

Among other measures, all public gatherings were banned, except funerals, whose numbers were limited to 30 people. Industry and commerce were ordered to operate on 50% staff. Operating hours for retail shops were set at 8.00 am to 3.30 pm. Stricter enforcement of the wearing of face masks in public places, social and physical distancing, as well as frequent washing and sanitizing of hands, were called for. Beer halls and nightclubs were ordered to remain closed with hotels, lodges, bars, and restaurants allowed to open only to residents until 10.00 pm.

The localized Kwekwe lockdown was extended by two weeks. Further, more places, namely, Kariba, Makonde, and Hurungwe were put under localised lockdowns. In such areas, a 6.00 p.m to 6.00 a.m curfew was imposed, while access to and from the areas under localized lockdowns was banned, except for essential services. Public transport was ordered to carry half their carrying capacity to enable physical distancing and every public transport vehicle to be disinfected after every trip.

On 23 June, more localized lockdowns were approved by Cabinet in the following areas: Karoi, Makonde, Chinhoyi, Mhangura, Chidamwoyo, Magunje, and Chirundu (Mashonaland West Province); Nkulumane, Emakhandeni, and Northern Suburbs (Bulawayo Metropolitan Province); Mount Darwin in Mashonaland Central Province; and Chiredzi in Masvingo Province.

Vaccination against COVID-19 continued. In the same month, the country received 25,000 Sputnik V doses from Russia. In addition, 500 000 Sinopharm shots bought from China were received within the month of June.
